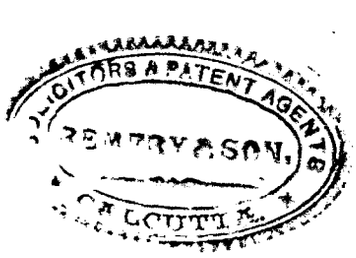
APPLICATION.

TO THE DEWAN OF MYSORE:

The Application of ALFRED JAMES, of 2 Broad Street Place, in the City of London, England, Mining and Metallurgical Engineer, for leave to file a Specification under Part 1 of the Mysore Inventions and Designs Regulation, 1894.

1. The Applicant is in possession of an invention for " IMPROVEMENTS IN THE LIXIVIATION OF ORES AND THE LIKE";he is the Assignee thereof; and, to the best of his information and belief, the invention is new within the meaning of Part 1. of the Mysore Inventions and Designs Regulation, 1894, and no circumstance exists which, if the applicant is authorized to file a Specification and files it in accordance with that part, will disentitle him to an exclusive privilege thereunder in respect of the Invention.

No Application has been made for a Patent in the United Kingdom, or an Exclusive Privilege in British India, by or on behalf of the Applicant in respect of the Invention.



2. The following is a description of the Invention :-

It has been found that in certain lixiviation processes, as for example the cyanide process, for the extraction of the precious metals, improved results are obtainable under certain conditions from the heating of the solutions, and arrangements have been made for utilising the heat of waste gases by passing such solutions through tubes around which the waste gases are led, now according to the present invention I perform this operation more simply and more efficaciously by leading the waste gases direct through the solution, where they do not affect the solution deleteriously, and at the same time use is made of the buoyancy of the waste gases for effecting the effectual mixing of the pulp, as for example, by using the waste gases on the principle of the Pöhle air lift or what is known as the " Brown " Agitator (see British Patent No.18922 of 1904). Where waste gases may not be conveniently used then I apply heat from any convenient or cheap source to air compressed, as for example for the agitator referred to above; by this means I not only restore to the air the heat lost during compression and to this extent balance the shock or repression of the solvent power of the solution due to the introduction of cold air, but I also increase the capacity of the air on account of the greater heat at which it is introduced to the solution and thus effect a saving in the amount of air required as well as obtain greater dissolving power arising from the use of solutions so heated.

Having now particularly described and ascertained the nature of my said invention, and in what manner the same is to be performed, I declare that what I claim is :-

In lixiviation processes :-

1. The introduction of waste gases directly into the solutions employed, so as to heat same and also to effect the more efficient circulation and agitation of such solutions and of the ore pulp or the like.

2. The use of waste gases in agitators acting on the principle of the Pöhle air lift or "Brown" agitator for the purpose of effecting agitation and improving extraction.

3. The introduction of heated compressed air directly into the solutions employed so as to heat same and also to effect the more efficient circulation and agitation of such solutions and of the ore pulp or the like.

4. In processes for the agitation of solutions, pulp and the like by compressed air the heating of the compressed air prior to its application to the pulp for the purpose of effecting a saving in the consumption of compressed air, and for improving extraction by heating the solutions.

3. The Applicant, therefore, applies for leave to file a Specification of the Invention pursuant to Part 1 of the Mysore Inventions and Designs Regulation, 1894.

....Cooper Lane.....

I, the Applicant abovenamed, do hereby declare that what is stated in the above Application is true to my knowledge, except as to matters stated on information and belief, and as to those matters I believe them to be true.

Dated this day of 1909

.....Cooper Lane.....

ab 31 87 July 09

GOVERNMENT OF MYSORE

General Department.

Register No. 1 **of 190** 9.-10

Bangalore, the 31 87 July *190* 9

WHEREAS an application, ~~dated the~~ without date ~~and~~ received on the 18th June 1909., has been submitted under Section 5 of the Mysore Inventions and Designs Regulation, 1894, by Alfred James, of 2 Broad Street place, in the City of London England, mining and metallurgical Engineer (hereinafter referred to as "the applicant") for leave to file a specification of an invention for "Improvements in the Lixiviation of ores and the like"

And whereas the applicant has duly complied with all the requirements of Section 5 of the said Regulation;

The Government of Mysore are pleased, under Section 6 of the said Regulation, to authorize the applicant to file a specification of the said invention in accordance with the provisions of the said Regulation.

ORDERED, that the applicant be, and he is hereby, informed accordingly.

By Order of the Government of Mysore,

dfz

CSB 27/7/09

for *Secretary to the Govt. of Mysore,*
Gen. and Rev. Depts.

bw

Certified that the fees prescribed in the fourth schedule to the Mysore Inventions and Designs Regulation, 1894, in respect of the application for leave to file the said specification and of the filing thereof have been paid by the applicant, and that the specification hereinbefore described has been duly filed in accordance with the provisions of Section 8 of the said Regulation on this the Eighteenth day of January ~~190~~ 1910.

CRs

dfz for *Secretary to the Govt. of Mysore,*
Gen. and Rev. Depts.

(Section 8 of the Inventions and Designs Regulation, 1894.)

8. (1) If within six months from the date of an order under Section 6, Sub-Section (1), or within such further time, not exceeding three months, as the Government of Mysore, in its discretion, may, on cause shown to its satisfaction and on payment of the fee prescribed in that behalf in the fourth schedule, see fit to allow, the applicant causes a specification of his invention to be filed in manner by this Part required, and the fee prescribed in the fourth schedule in respect of the filing of the specification to be paid, the applicant shall, subject to the other provisions of this Part, be entitled to the exclusive privilege of making, selling and using the invention in the Territories of Mysore, and of authorizing others so to do, for a term of fourteen years from the date of the filing of the specification.

(2) But an exclusive privilege in respect of an invention of a new manufacture shall, notwithstanding anything in Sub-Section (1), cease, if the inventor fails to pay, within the time limited in that behalf by the fourth schedule, any fee prescribed in that schedule in respect of the continuance of the privilege.

(3) If, nevertheless, in any case, by accident, mistake, or inadvertence, an inventor fails to pay any such fee within the time so limited, he may apply to the Government of Mysore for an enlargement of the time for making the payment.

(4) Thereupon the Government of Mysore may enlarge the time accordingly, on payment of the fee prescribed in that behalf in the fourth schedule, and subject to the following conditions, namely :—

(*a*) the time for making a payment shall not in any case be enlarged for more than three months ; and

(*b*) if any suit is instituted in respect of an infringement of the exclusive privilege committed after a failure to make a payment within the time limited for the making thereof and before the enlargement of that time, the Court disposing of the suit may, if it thinks fit, refuse to award or give any damages in respect of the infringement.
